A New Era of Clean in Central Oregon  
How we are revolutionizing Chemical-Free Cleaning

## About our Natural Products and Services

**Nurturals** All Natural Cleaning Products are 100% naturally derived ingredients, originally formulated to clean wildlife affected by oil spills. All of our products are safe and naturally wipe out bacteria, germs, grease, grime and tough stains. Our products do not contain any synthetic fragrances, dyes, parabens, petroleum solvents, alcohol, sodium laurel/lauerth sulfates or ethoxylates. All Nurturals products are safe for homes with pets, allergies, asthma, and those with the desire to live a chemical free lifestyle and detox their home!

**Floor** cleaner is similar to the above product with a lighter strength formula to be used on all sealed floor surfaces including hardwoods, laminate, vinyl, tile, granite, etc. Our floor cleaner is safe for Kids, pets and those with compromised immune systems and allergies.

**Organic Nurturals Essential Oils** is our own organic line used to scent the above cleaning products. Our cleaning products do come naturally unscented therefore we can clean "scent free" if that is your preference. Or we can custom scent the cleaner to your liking with our Organic essential oils to create a delightful scent of whichever single/blended oils you choose.

**ProTeam Anti-Allergen** vacuums are superior! Our vacuums have a triple Hepa Filtration system that captures 99.9% of dust mites, pollen, bacteria and other particles measuring 1 micron and larger. Our vacuums have earned the Gold Seal of Approval/Green Label from the Carpet and Rug Institute, signifying the vacuum system meets higher standards for carpet cleaning effectiveness and indoor air quality. It also meets the requirements of the U.S. Green Building Council's LEED rating system for Green Cleaning – Sustainable Cleaning Equipment. Since our vacuums trap 99.9% of all dust, dander and allergens you do not have to worry about allergens being picked up in another home and blown back into your home by the exhaust of the vacuum (Like most all other vacuums do)!!

### Our Eco Friendly, Hypo Allergenic Microfiber Method.

Our professional grade Microfiber cleaning process is leaps and bounds better than any other cleaning method! We are the only cleaning company in the area that uses a superior **3 step dusting process**: 1. Swiffer Dust from high to low. 2. Damp wipe 3. Buff surface to a shine.

**Eco-Friendly Glass & Mirror cleaning methods:** For glass & Mirrors we do not use any harsh chemicals such as Windex or aerosol glass cleaners because they are toxic to your health and create buildup on the glass which traps more dust and causes streaks. Glass cleaning method consists of two step protocol: for small mirrors and glass surfaces we use a damp microfiber cloth to clean the glass and then buff dry with a Patented Super Silk Wiper.

For large or very dirty glass & mirrors we use professional grade squeegees with a tiny bit of non toxic soap, this helps break down all the dirt, grease, and grime so the squeegee can remove it in just a few strokes! This professional method leaves mirrors shiny & Streak Free.

**Eco-Friendly Microfiber Mopping system:** We use only high grade, anti-bacterial microfiber flat mop pads so we can change out our mop pads between homes so germs, pet dander and bacteria are not being transferred from one home to another. Our Microfiber mops use low moisture therefore our mopping methods are safe on all types of floors including laminate and hardwoods.
